Subject: Techalloy May 2017 Monthly Progress Report

John--I have reviewed the May 2017 Monthly Progress Report for the Techalloy/Central Wire facility in Union, IL. I have just a couple of comments.

1. The pumping rate on the extraction wells, presumably mostly EW-2, continues to decline. This decline continues to cast doubt on the extent of capture of the plume.
2. Table 3--the scale of the plots is too large to allow much interpretation of the data. Probably not worth re-doing, but future submissions should use a more appropriate scale--such as used for table 4.
